# Helping You Go Green!

We want to help you more easily source products to meet your sustainability needs. So, we've created a 3-factor method for validating the products in our assortment with accurate & verifiable global sustainable components, sustainable manufacturing practices and a responsible mindset.

- Styles with **Sustainable Materials** contain all or a portion of verified sustainable fibres or materials.
- Styles with **Sustainable Manufacturing** have been validated across a wide range of fabric and product manufacturing practices by globally recognized organization.
- Styles with **Responsible Mindset** are from brands with social and sustainable 'give-back' policies directly linked to the products sold in our industry.
- We also recognize products designed specifically to reduce use of disposable products, products designed to be easily recycled and products designed to reduce packaging waste.

Please refer to the style's product detail page for enhanced fabric and features information.

# stretch puffers

# sub**D**@wn°

UTK SubDown® is a revolutionary insulation technique that mimics the thermal qualities of down, using an easy-care material that is more hypo-allergenic.

Traditional polyfill batting requires thick, uncomfortable layers to achieve maximum thermal protection from the cold.

UTK SubDown® fibres mimic the physical dimensions of down and are blown into the garment channels just like down. The result is a lightweight lofty fill with more air pockets and the thermal retention of 600 fill down. UTK SubDown® is the ideal in "warmth without weight" insulated garments.

# <sup>⊮</sup> Hydr∙pel°

UTK Hydropel® technology adds superior water-repellent functionality to fabrics.

North End® utilizes UTK Hydropel® technology in many ways, including seam-sealed waterproof garments for severe wet weather conditions, water-resistant fabrications with a built-in membrane for enhanced wind protection, or a simple DWR (durable water repellent) finish on a lightweight shell. Whatever the level of weather protection needed, North End® has a solution.

Our ACTIVE FIT is a true-to-size cut, that falls free from the body with a slight taper to reduce bulk in layering. The perfect combination of form and function.

#### TEAM FIT

Our TEAM FIT allows garments to move and flex easily, in a non-restrictive silhouette that's comfortable for the active wearer, whether athlete, coach or fan.

## Finding your perfect garment size is easy

#### How to Measure

CHEST: Measure just under the arms, across fullest part of chest, around shoulder blades holding tape firm and level.

WAIST: Measure your natural waistline, keeping one finger between the tape and the waist.

HIP: Stand and measure around the fullest point of hips.

SLEEVE LENGTH: With arm relaxed at side and slightly bent, measure from centre back neck, over the shoulder, down to the outer wrist.

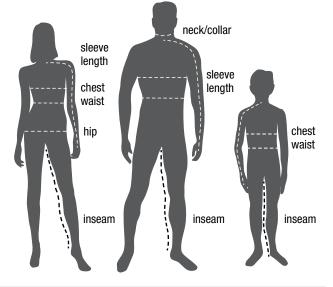

**INSEAM:** Stand and measure from centre crotch to bottom of ankle bone. (Please refer to specific style for garment inseam length.)

#### UNISEX: Men's medium is similar to ladies' large.

Sleeve length will be about 1-11/2" longer. Body of garment is not form fitting. Unisex medium is equivalent to men's medium through chest and sleeve length.

#### TALL SIZES:

Men's garments have added length in the body and sleeves. Short-sleeves are 1" longer, long-sleeves and body length are 2" longer.
